

Quality report for the KRHDSS dataset

Household member table variables:

ID variables: 'individualid', 'permid', 'individ_id', 'hhno', 'village_id', 'village_name', 'addedby', 'chu_name'

Categorical variables: 'age_year'* , 'age_cohort'* , 'sex', 'relation', 'orphan', 'birthcert', 'school', 'pregnant', 'mc_booklet', 'anc4_p', 'skilleda', 'ex_bfeed', 'fplan', 'penta1', 'penta3', 'full_immune*', 'vitamina', 'food_3', 'smalnaud', 'modmalna', 'lilin', 'kchronici'* , 'cough', 'hivstatus', 'disability*', 'round', 'event', 'measles*', 'measles9*', 'measles18*', 'full_immun'*

Numerical variables: NA

Datetime variables: 'dob', 'doim', 'doi', 'doif*', 'dobm', 'doi1*', 'dob1*', 'event_date*', 'date_event*', 'datestamp'

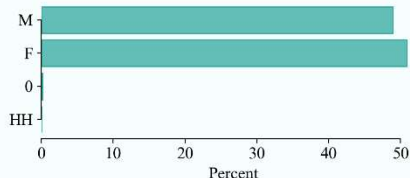

Free text: 'others', 'oth_important', 'event_comm'

Notes:

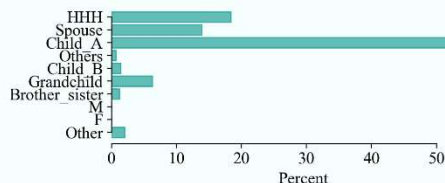

1. Round 4 includes the variables doi1 and dob1.
2. Round 8 includes the variable doif.
3. The 'full_immune' variable transitions to 'full_immun' starting from round 4.
4. The 'measles' variable seems to diverge into 'measles9' and 'measles18' from round 4.
5. The 'event_date' variable appears to transform into 'date_event' starting from round 4.
6. There is a significant decrease in counts for round 8, with only 43,517 records compared to other rounds.
7. The 'kchronici' (Known Chronic Illness) variable, expected to have 7 categories, actually contains 76.
8. The 'disability' variable, expected to have 7 categories, actually contains 68.
9. Several variables, including 'sex', 'relation', 'orphan', 'pregnant', 'anc4_p', 'skilleda', 'ex_bfeed', 'fplan', 'penta1', 'lilin', 'cough', 'hivstatus', and 'full_immun', contain invalid entries.

Member Table Variables Overview

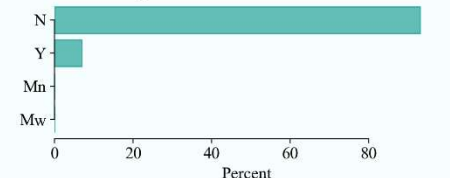

"sex" - NaN values: 1.20%

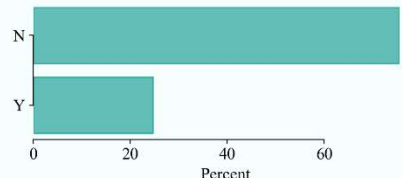

"relation" - NaN values: 4.50%

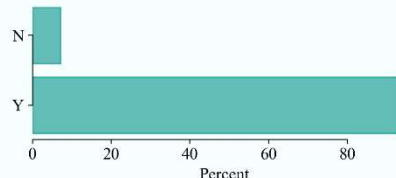

"orphan" - NaN values: 53.24%

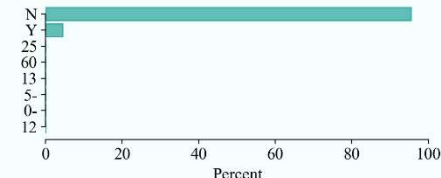

"birthcert" - NaN values: 4.57%

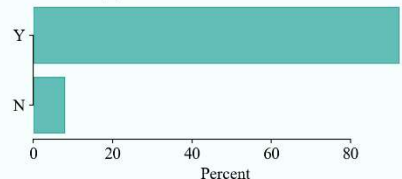

"school" - NaN values: 65.77%

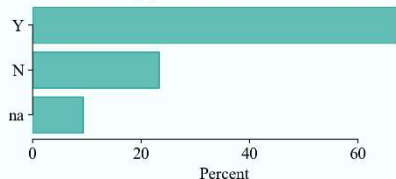

"pregnant" - NaN values: 79.43%

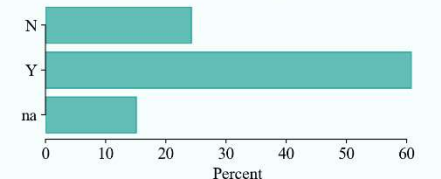

"mc_booklet" - NaN values: 86.93%

"anc4_p" - NaN values: 97.77%

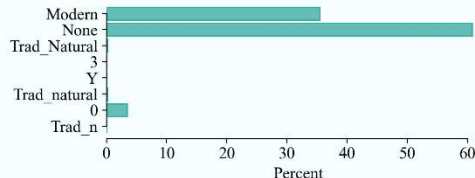

"skilleda" - NaN values: 98.50%

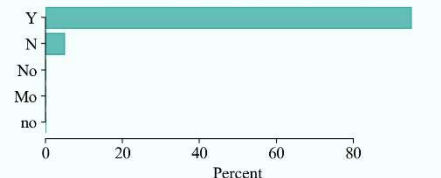

"ex_bfeed" - NaN values: 96.57%

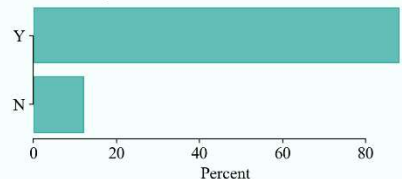

"fplan" - NaN values: 79.57%

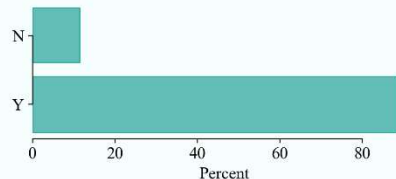

"penta1" - NaN values: 98.31%

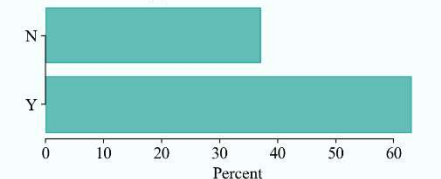

"penta3" - NaN values: 98.44%

"vitamina" - NaN values: 86.53%

"food_3" - NaN values: 97.46%

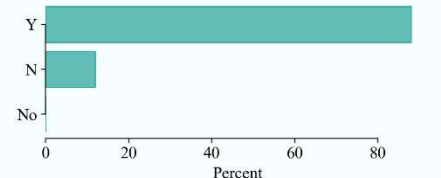

"smalaur" - NaN values: 86.43%

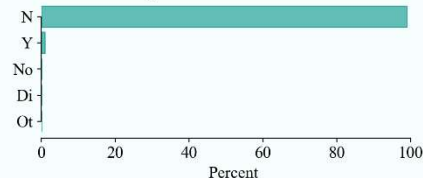

"modmalna" - NaN values: 86.41%

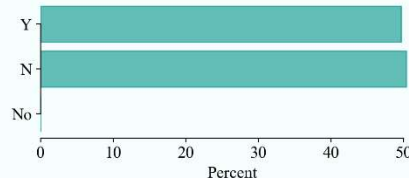

"lilin" - NaN values: 4.40%

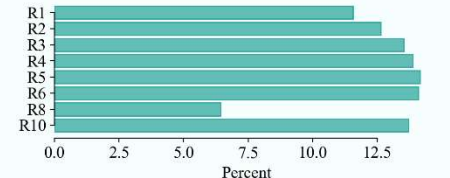

"cough" - NaN values: 4.38%

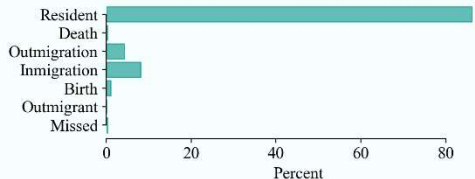

"hivstatus" - NaN values: 19.52%

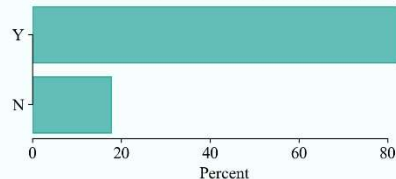

"round" - NaN values: 8.89%

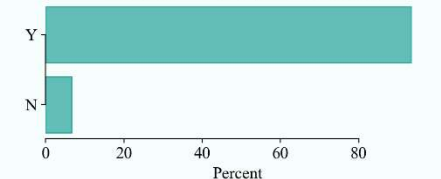

"event" - NaN values: 10.64%

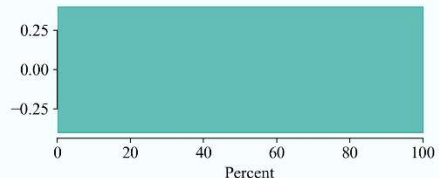

"measles" - NaN values: 99.00%

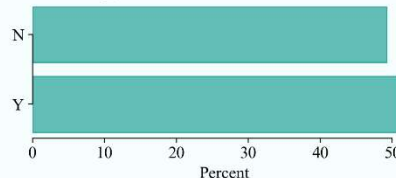

"measles9" - NaN values: 98.80%

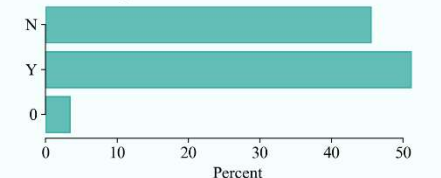

"measles18" - NaN values: 99.38%

"full_immune" - NaN values: 99.34%

"full_immun" - NaN values: 98.76%

Household table variables:

ID variables: 'hhno', 'village_id', 'village_name', 'facility_name', 'chv_id'

Categorical variables: 'safewater', 'watertre', 'handwash', 'latuse_r', 'refused', 'round'

Numerical variables: 'Latitude', 'Longitude', 'Altitude', 'Accuracy'

Datetime variables: 'datestamp', 'today'

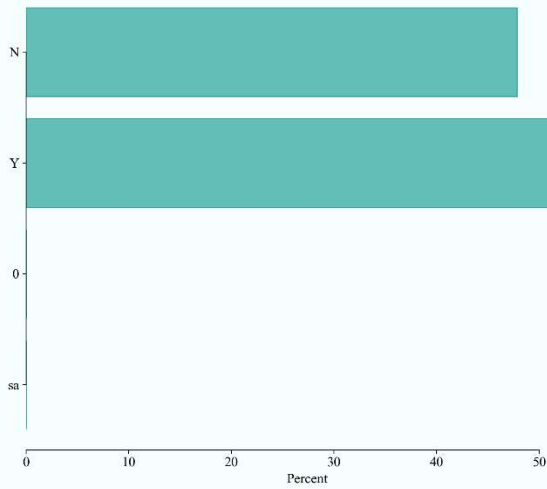

Free text: 'others', 'addedby'

Notes:

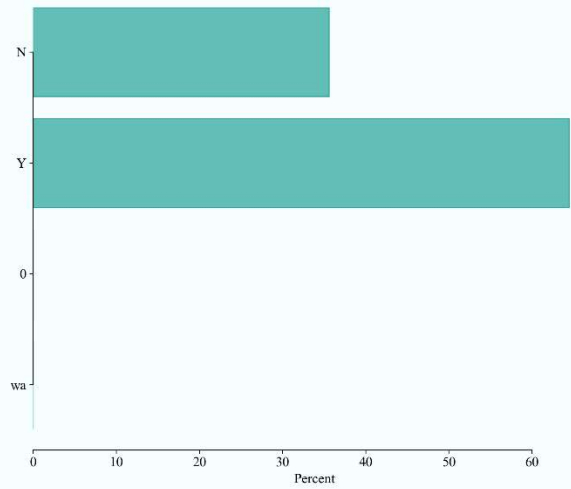

1. Presence of GPS coordinates: 'Latitude', 'Longitude', 'Altitude', 'Accuracy'
2. The following variables contain invalid entries: 'safewater', 'watertre', 'handwash', 'latuse_r', 'refused'

Household Table Variables Overview

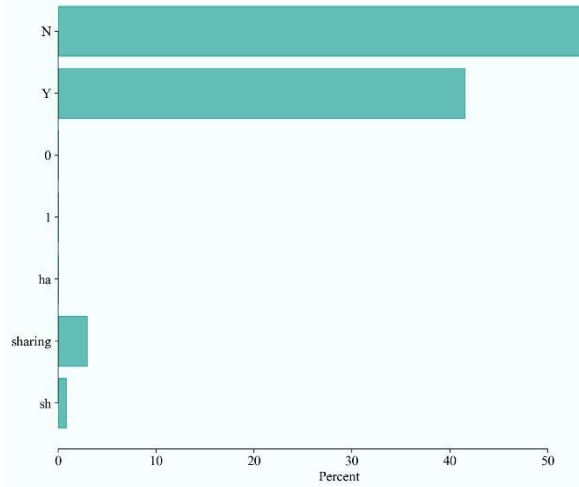

"safewater" - NaN values: 1.73%

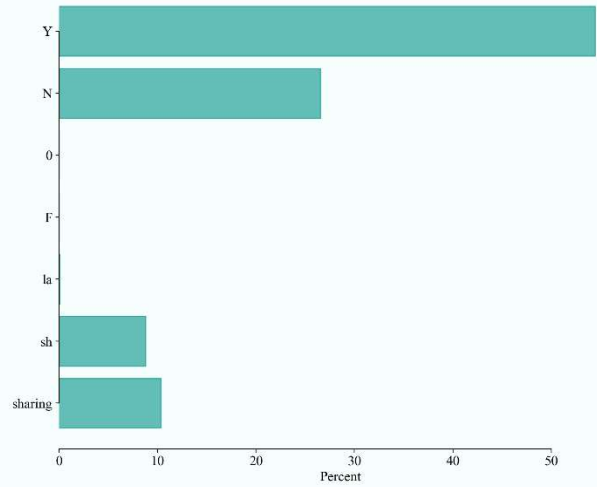

"watertre" - NaN values: 1.27%

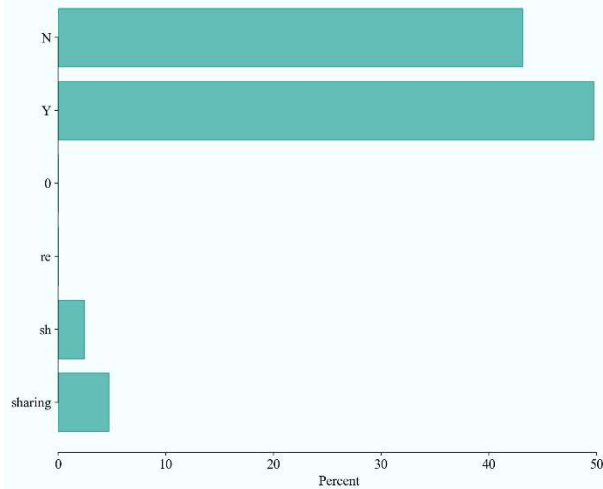

"handwash" - NaN values: 1.27%

"latuse_r" - NaN values: 1.27%

"refused" - NaN values: 1.40%

"round" - NaN values: 0.00%
